

ROCOMBI Cargo Terminal

The Strategic Logistics Hub
of Transylvania

Designed for massive scalability and uncompromising operational efficiency in the heart of regional distribution.

Capacity Offer and Operational Profile 2026

Multi-Modal Connectivity: The Region's Main Access Gateway

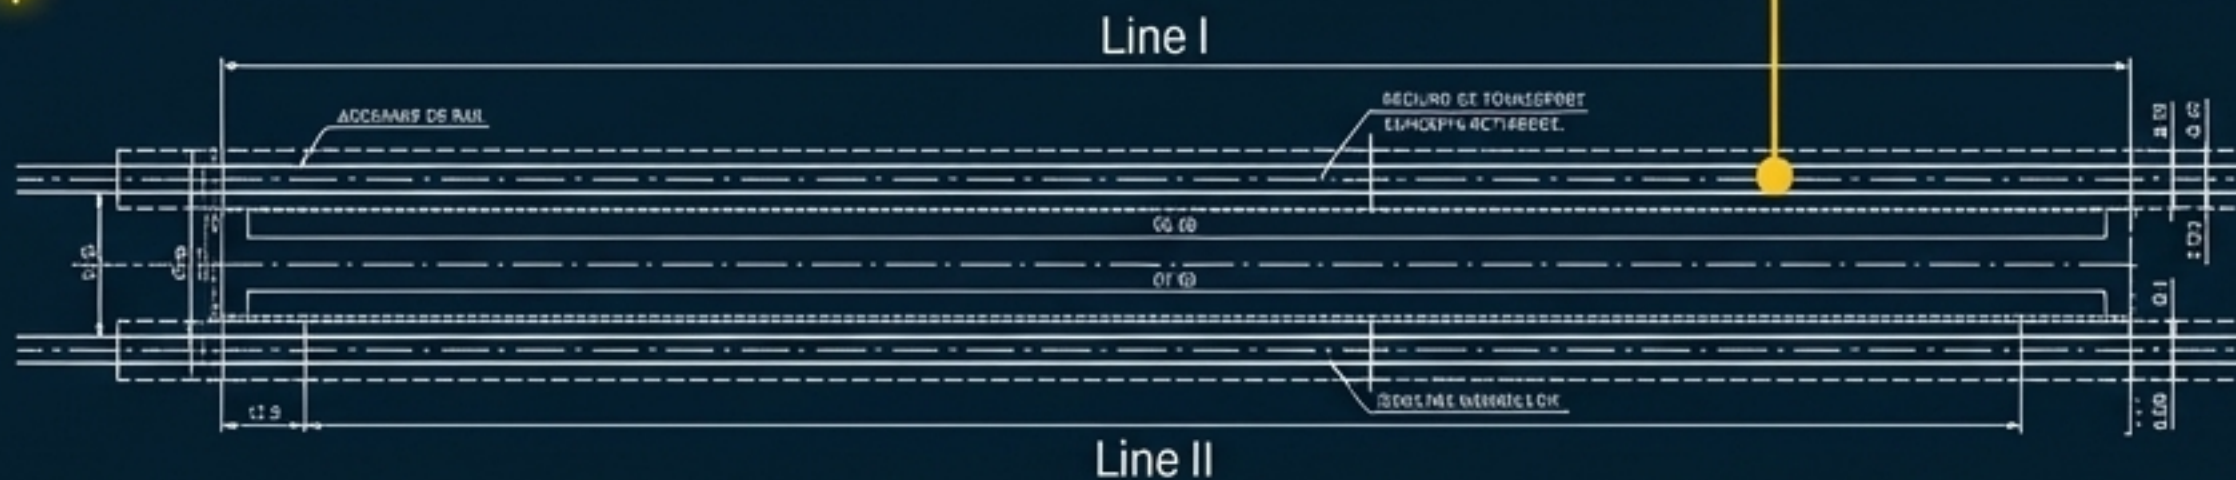

Central distribution hub for freight flows throughout the Transylvania region

Efficiency Architecture: 770 Meters of Dedicated Transshipment Lines

420 meters

Operational length.
Served exclusively and rapidly
by reach stacker equipment.

350 meters

Common useful length.
Served simultaneously
by the heavy-duty gantry
crane.

Architecturally optimized platform for simultaneous maneuvers and continuous cargo flow—eliminating handling downtime.

Transshipment equipment for heavy cargo: Heavy Tonnage Fleet

Portal Crane

32 tons

- Width 25m | Working length 320m | Spreader 20' and 40'
- Optimized for containers and swap bodies.

Fantuzzi Reach Stacker

42 tons

- Maximum stacking 3 rows high | Spreader 20' – 40'
- High-speed heavy handling on Line I.

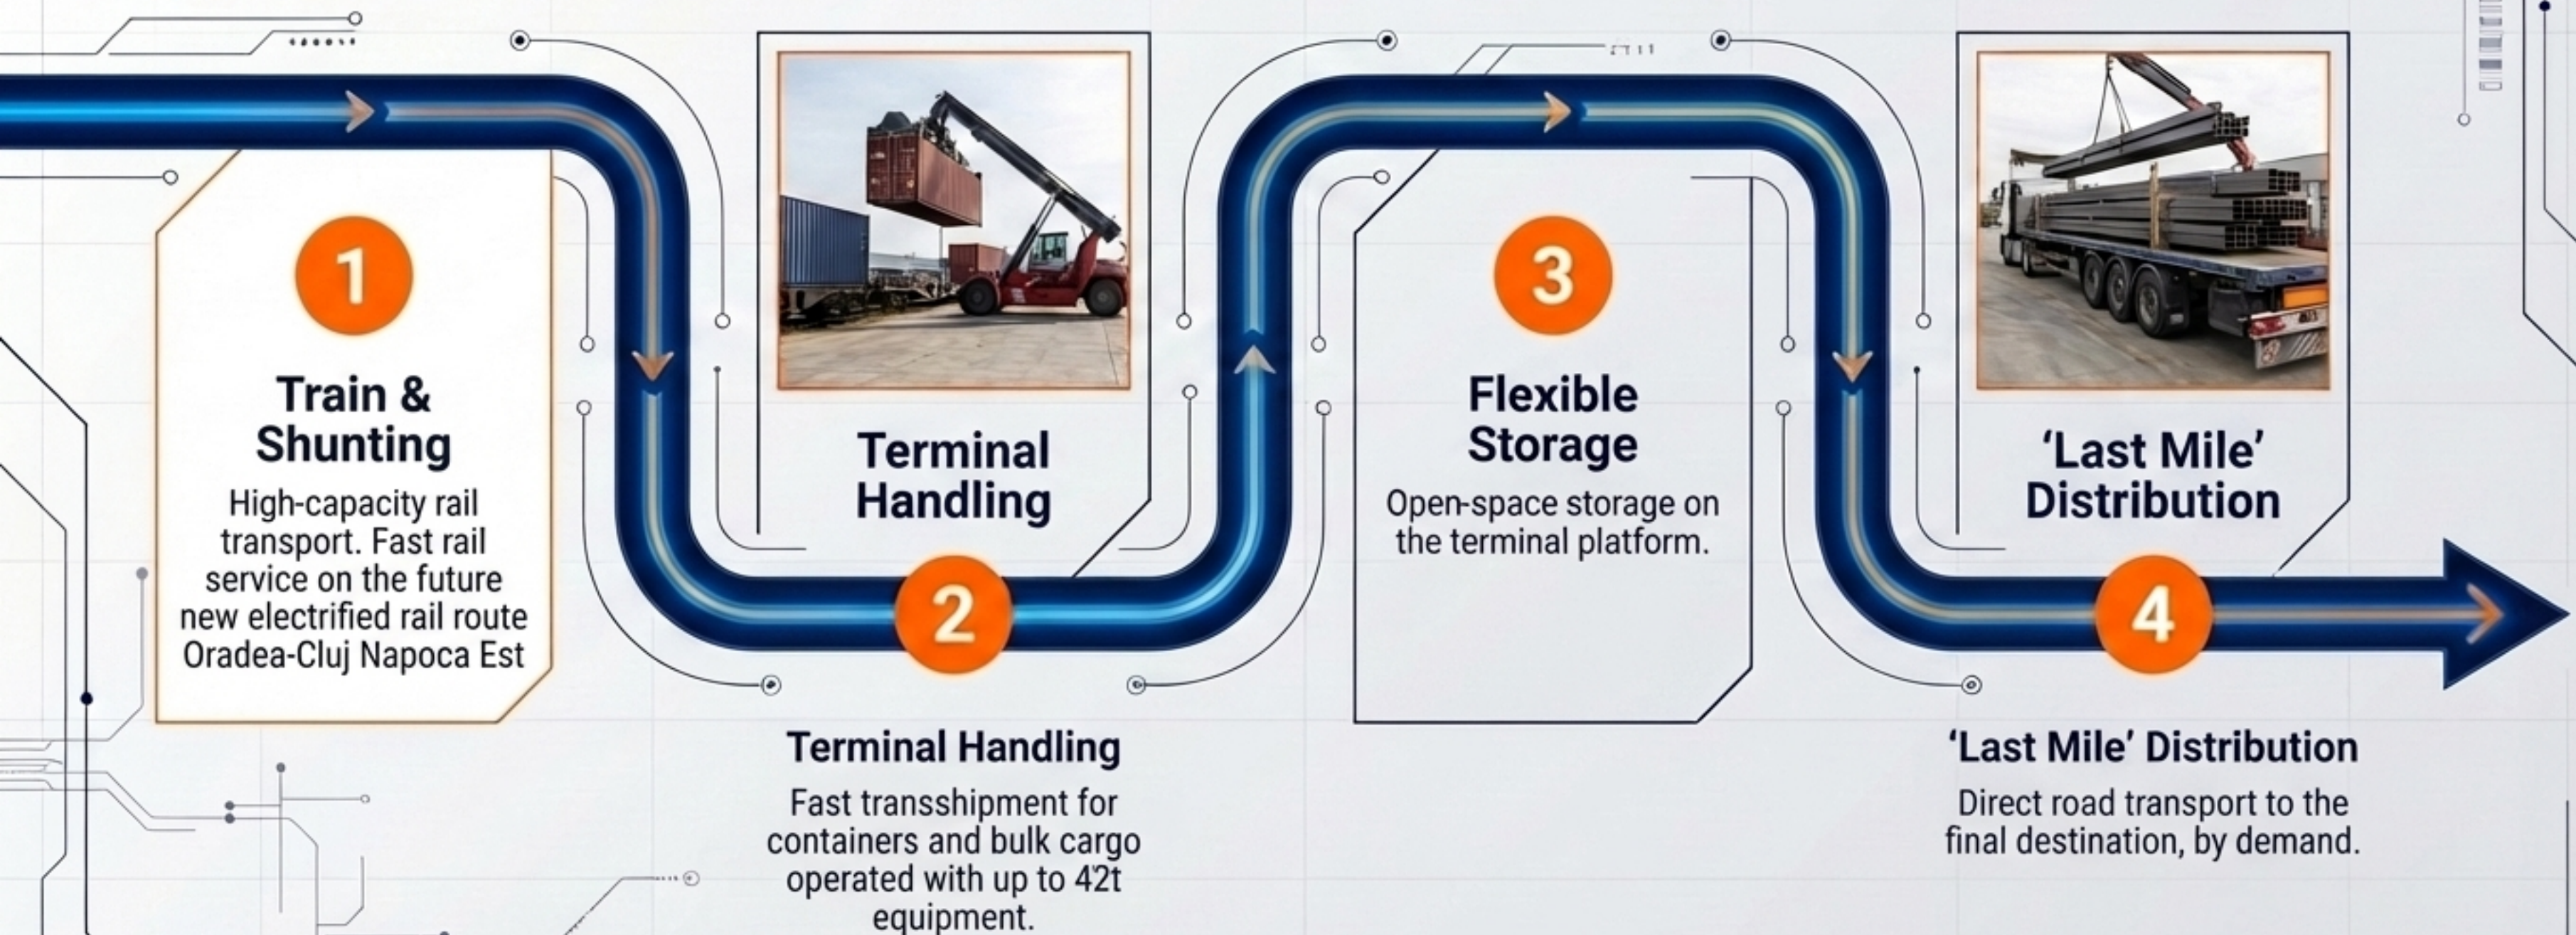

Forklift

7 tons

- Attachable devices for general cargo.

Support Fleet: Additional equipment includes empty container handler (12 tons) and 3.5-ton forklift.

The 360° Ecosystem: A Single Partner, from Rail Shunting to the 'Last Mile'

Beyond Standard: over 20 years of experience

Containers, steel coils, steel products and general cargo

→ **Dedicated capacity** for handling **metal bars, plates, and rebar**, as well as palletized goods or **big-bags**.

- **Specialized equipment:** special device (12,000 kg capacity) for safe handling of steel coils.

In-House Maintenance and Repairs

→ **Rapid on-site interventions:** Immediate repairs for structural damage, holes, or damaged floors.

- **Integrated technical services:** Industrial welding and professional cleaning of containers executed directly in the terminal, eliminating transfer costs.

ROCOMBI: Your Complete Logistics Solution

Strategic Location

Central distribution axis for industry in Transylvania, immediately connected to road and air routes.

Heavy Tonnage Infrastructure

770m of active transshipment lines and a fleet of equipment with capacity up to **42 tons** (Fantuzzi / Gantry).

Create your own logistic hub!

rail transport - cargo handling and storage - last mile truck distribution
